

PRESS RELEASE

ANOXKALDNES WINS NEW CONTRACT IN INDIA WITH OUR LICENSEE, GLOBAL ENGINEERING

Lund 27th September, 2007

AnoxKaldnes received its first order for the Indian pulp and paper industry together with our licensee Global Engineering. The order comprise delivery of engineering and carriers for the ITC Bhadrachalam mill, which needs to upgrade its treatment as a new pulp production line is taken into operation. The order is worth USD 1 million, which includes Global Engineering's work in addition to our own scope of supply. The delivery is due late this year and the plant will hopefully be a good reference in the Indian pulp and paper industry which is in an expansion phase.

AnoxKaldnes is a developer and global provider of leading edge technology for biological treatment of industrial and municipal wastewater. For more information about AnoxKaldnes products and services visit us at <http://www.anoxkaldnes.com>.
